DRAFT RESULTS FRAMEWORK
OF THE STRATEGIC PLAN FOR 2014-2019

OVERVIEW

[Rev.5: 10 January 2012]
### Results Framework of the Strategic Plan for 2014-2019: Overview

#### UN-Habitat Strategic Result

Environmentally, economically and socially sustainable and gender-sensitive urban development policies implemented by national, regional and local authorities improve the standard of living of urban dwellers

#### Strategic Result Indicators of Achievement

| (a) Percentage of people living in slums, disaggregated by gender | (b) Quantity of new urban housing for low income households |
| (c) Percentage of people residing in urban areas with access to safe drinking water and adequate sanitation services, disaggregated by gender | (d) Number of city, regional and national authorities that have adopted urban policies supportive of local economic development and creation of decent jobs |
| (e) Number of city and regional authorities that have implemented sustainable urban plans and designs that are inclusive and respond to urban population growth adequately |

#### Focus Area Strategic Results

1. City, regional and national authorities have established systems for improved access to land, adopted enabling legislation, and put in place effective decentralized governance that fosters equitable sustainable urban development

2. City, regional and national authorities have implemented policies, plans and designs for more compact, better integrated and connected cities that foster equitable sustainable urban development and are resilient to climate change

3. City, regional and national authorities have improved capacity to implement urban policies supportive of local economic development, creation of decent jobs, and enhanced municipal finance

4. City, regional and national authorities have implemented policies for increasing equitable access to urban basic services and improving the standard of living of the urban poor

5. City, regional and national authorities have implemented policies for increasing access to adequate housing and improving the standard of living in existing slums

6. Cities have increased resilience to the impacts of natural and human-made crises, in an equitable manner, and undertaken rehabilitation in ways that advance sustainable urban development

7. Knowledge of sustainable urbanization issues disseminated and capacity enhanced at international, national and local levels in order to improve formulation and implementation of evidence based policies and programmes and to improve public awareness of the benefits of and conditions necessary for sustainable urbanization

#### Indicators of Achievement

| a) Number of city, regional and national authorities that have established systems for improved access to land, and adopted enabling legislation and the international guidelines on decentralization and strengthening of local authorities | a) Number of partner city, regional and national authorities that have developed urban policies, plans and designs for more compact, better integrated and connected cities that foster equitable sustainable urban development and are resilient to climate change |
| a) Number of partner city, regional and national authorities that have developed human and institutional capacity to implement urban policies supportive of local economic development, creation of decent jobs, and enhanced municipal finance | (a) Number of partner city and regional authorities that have developed the international guidelines on access to basic services for all, including safe drinking water, adequate sanitation, waste collection and management, domestic energy, and public transport |
| (a) Number of partner city, regional and national authorities that have implemented urban policies supportive of local economic development, creation of decent jobs, and enhanced municipal finance | (a) Number of partner city, regional and national authorities that have implemented improved urban housing policies and programmes |
| (a) Number of partner city, regional and national authorities that have implemented and integrated risk reduction strategies and programming within their urban planning and management systems | (a) Number of partner city, regional and national authorities and other partners with the capacity to formulate and implement evidence based urban policies and programmes |
