DRAFT RESULTS FRAMEWORK
OF THE STRATEGIC PLAN FOR 2014-2019

OVERVIEW

[Rev.7: 01 February 2012]
### Results Framework of the Strategic Plan for 2014-2019: Overview

**UN-Habitat Strategic Result**

Environmentally, economically and socially sustainable, gender-sensitive and inclusive urban development policies implemented by national, regional and local authorities have improved the standard of living of the urban poor and enhanced their participation in the socio-economic life of the city.

#### Strategic Result Indicators of Achievement

- **(a)** Percentage of people living in slums, disaggregated by gender
- **(b)** Percentage of urban population with access to adequate housing
- **(c)** Percentage of people residing in urban areas with access to safe drinking water, adequate sanitation and regular waste collection services, clean domestic energy and public transport, disaggregated by gender
- **(d)** Number of city, regional and national authorities that have implemented urban policies supportive of local economic development and creation of decent jobs and livelihoods
- **(e)** Number of city and regional authorities that have implemented sustainable urban plans and designs that are inclusive and respond to urban population growth adequately

### Focus Area Strategic Results

1. City, regional and national authorities have established systems for improved access to land, adopted enabling legislation, and put in place effective decentralized governance that fosters equitable sustainable urban development, including urban safety

2. City, regional and national authorities have implemented policies, plans and designs through a participatory process including all different actors, such as civil society and poor people, for more compact, better integrated and connected cities that foster equitable sustainable urban development and are resilient to climate change

3. City, regional and national authorities have adopted or implemented improved urban strategies and policies supportive of local economic development, inclusive economic participation, creation of decent jobs and livelihoods, and enhanced municipal finance

4. City, regional and national authorities have implemented policies for increasing equitable access to urban basic services and improving the standard of living of the urban poor

5. City, regional and national authorities have implemented policies for increasing access to adequate housing and improving the standard of living in existing slums

6. Cities have increased their resilience to the impacts of natural and human-made crises, in an equitable manner, and undertaken rehabilitation in ways that advance sustainable urban development

7. Knowledge of sustainable urbanization issues disseminated and capacity enhanced at international, national and local levels in order to improve formulation and implementation of evidence based policies and programmes and to improve public awareness of the benefits of and conditions necessary for sustainable urbanization

### Indicators of Achievement

- **(a)** Number of city, regional and national authorities that have established systems for improved access to land, and adopted enabling legislation

- **(a)** Number of partner city, regional and national authorities that have implemented urban policies, and have adopted or implemented improved urban strategies and policies supportive

- **(a)** Number of partner city, regional and national authorities that have implemented policies for increasing housing policies and programmes

- **(a)** Number of partner city, regional and national authorities that have implemented improved urban strategies and policies for increasing integrated risk reduction strategies and programming

- **(a)** Number of partner city, regional and national authorities and other partners with the capacity to formulate and implement evidence based urban policies and programmes
and the guidelines on decentralization and strengthening of local authorities and on access to basic services for all plans and designs that apply principles and standards derived from best practices of local economic development, inclusive economic participation, creation of decent jobs and livelihoods, and enhanced municipal finance to equitable access to basic services, including the promotion of the guidelines on decentralization and strengthening of local authorities and on access to basic services, including safe drinking water, adequate sanitation, waste collection and management, domestic energy, and public transport benefiting the poorer parts of the urban population within their urban planning and management systems, with particular emphasis on the most vulnerable population.
