Meeting Place for Planners

8th international Symposium on information and communication technologies in urban and spatial planning and impacts of ICT on physical space

February 25 - March 1, 2003
Vienna University of Technology, Vienna, Austria

Special topics of CORP2003:
GLOCALIZE.IT! & 4D city & landscape modeling
About CORP

CORP Symposions are held annually since 1996 and have become a major European conference dealing with the impacts of information- and communication technologies on urban and spatial planning. New possibilities for using technology as planning and administrative support tools, perspectives of planning disciplines within the "information society" as well as "the future of geographical space" are presented and discussed.

Special topic 1: GLOCALIZE.IT

The same goods in the same supermarket shelves from the North Cape to Fireland, the "business districts" of cities around the globe are like two peas in a pod and the price for the global product "hamburger" provides information about the economic resources of a country. Also the dream of one's own home with garden is nearly everywhere alike.
Do the meanings of local and regional characteristics completely disappear? Are they reduced to a few marketable folkloristic aspects? Or does the local and regional level even gain significance in the view of global and international developments? Is the slogan "think global, act local!" antiquated or more important than ever?
The guidance topic of CORP2003 is a request: GLOCALIZE.IT!
The discussion is up for the possibilities to act on local and regional level under the aspect of international and global developments, and the relationship of these aspects in the planning of the future. IT does not only stand for the request to act but also for the role of information and communication technologies in these processes.

Special topic 2:

4D CITY & LANDSCAPE MODELS

3D-models are permanently rising in popularity. More and more cities and tourism regions rely on the effects of 3D modelling. New techniques and fast hardware allow to produce stunning illustrations relatively cheap and quick. But do these improved visualisation opportunities really result in better plans and advantages in the development of cities and regions? Where are the real benefits of 3D modelling? And what about the time dimension for future plannings as well as for the past, i.e. for documentation and reconstruction of historical buildings? Do 4D City & Landscape Models already deploy all of their advantages?
Who should attend?

CORP addresses key actors in management, administration, politics and consultants, planners, service providers, researchers and students involved in "spatial thinking". CORP is an interdisciplinary event with participants coming from various fields, e.g. spatial planning, geography, economy, transport, computer science, architecture, humanities, etc. It is open for everyone with an interest in "geo-spatial relations".

Conference venue

Workshops & Welcoming: February 25th 2003
Vienna University of Technology, Representation Rooms, Karlsplatz 13, A-1040 Wien
Conference languages are German and English.

Registration

Please register for CORP2003 by completing reply card on CORP-Flyer, e-mail to corp@multimediaplan.at, fax to +43 1 9740161, or by online form at www.corp.at <http://www.corp.at>

TEILNAHMEGEBÜHR / ADMISSION FEE
regular fee Euro 250 Euro 280
students not older than 27 Euro 80 Euro 110
speakers (max. 2 per presentation) Euro 80 Euro 80
Please transfer admission fee to the following account:
IBAN AT68 1200 0006 3813 4304, BIC = BKAUATWW. We also accept VISA.

Call for papers

Present your work at CORP2003! Submit a paper-proposal by October 31, 2002 to corp@multimediaplan.at.
Please include:
your full name, title/position (also of co-authors)
complete address of company/organisation, your position
abstract (200-250 words)
Presentations should last about 20 minutes. The final paper should contain 4 to 8 pages and be formatted according to the guidelines that will be sent to the speakers.
TIMETABLE for PAPER-SUBMISSIONS:
Submission of abstracts by October 31, 2002
Information about acceptance of your paper by November 15, 2002
Delivery of the final paper according to given guidelines by December 20, 2002

Marketing Opportunities

Planning companies, service providers, software developers & distributors present their products in an exhibition area and in presentation forums. If you are interested in presenting your company and your products and/or in being a sponsor for CORP2003 please contact the CORP-Team at corp@mult mediaplan.at

Latest Infos

The final program will be published online in December 2002. If you have further questions please do not hesitate to contact:
