CORRIGENDUM

Revisions made following the meeting of CPR Working Group Meeting of 26 November 2010.

A. Executive Direction and Management

1. Paragraphs 80 – 82, page 20 have been deleted. Following further discussions with the ED, he specified the following four areas to be included in the work programme, municipal finance, urban mobility, urban legislation and strategic urban planning. More reflection is going on on how these areas will be presented in the work programme and the specific outputs to be delivered.

2. Page 23: Expected accomplishment: (e). ‘Results-based management principles applied’ has been moved to the Programme Support Division.

3. Page 22: An output on E-debates in support of the World Urban Forum 6 have been added under EDM as the debates will apply to all WUF activities

4. Page 23: Expected accomplishment: (c). Improved geographical representation and gender balance of suitably qualified and experienced staff. Indicator on gender has been added

   Increased percentage of women at the professional level and above for appointment of one year or more
   Baseline 2009: 42%
   Estimate 2011: 46%
   Target 2013: 48%

B. SUBPROGRAMME 1:

1. Page 30: Expected Accomplishment (a) (indicator (i)

Meaning of ecology: equity, and economic was requested and reflected as a footnote

For this indicator, the term "ecology" refers to the environmental aspects of sustainability. In the context of sustainable urbanization, integrating principles of ecology includes, *inter alia*, the integration of environment and climate change concerns in urban planning, management and governance processes; the optimization of materials, waste and energy flows in urban settlements; the protection of urban biodiversity; and the wise use of urban ecosystems. Principles related to “equity” are those which lead to the increase of opportunity, access, ownership and rights to all social groups, and particularly those who are marginalized in the areas of land, housing, services, and means of livelihood, decision-making, implementation and follow-up. Principles related to the “economic” refer to the way in which public and private business is transacted. The goal is to optimize the deployment of inputs and to convert negative external impacts into positive assets that can be used to reduce energy, pollution, and social costs. They also refer to practices that increase the value of each investment and to expand economic opportunities, as well as improve productivity and efficiency.

C. SUBPROGRAMME 3:

Page 56: The word ‘partially and fully’ added to the performance measure for indicator (a) (i)

1. (i) Degree to which national habitat forums working with UN-Habitat promote a coordinated approach to sustainable urbanization issues, as evidenced by the number of forums partially and fully promoting a coordinated approach on sustainable urbanization issues.
Baseline 2009: 12 National habitat forums partially and fully promoting a coordinated approach to sustainable urbanization issues

Estimate 2011: 17 National habitat forums partially and fully promoting a coordinated approach to sustainable urbanization issues

Target 2013: 20 National habitat forums partially and fully promoting a coordinated approach to sustainable urbanization issues

2. Page 59: Proposed wording for the indicator (d) (i)

(i) Level of access to environmentally sound urban infrastructure and services, especially in post-crisis countries supported by UN-Habitat, as evidenced by the number of countries with improved access to environmentally sound urban infrastructures and services

Performance measures

Baseline 2009: 20 countries

Estimate 2011: 30 countries

Target 2013: 40 countries

(ii) Increased number of national planning instruments, including United Nations Development Assistance Frameworks and poverty reduction strategies integrating sustainable urbanization issues with support from UN-Habitat

Target 2013: Sustainable urbanisation issues are integrated into 27 United Nations Development Assistance Frameworks; 25 National Development plans and 14 Poverty Reduction Strategies.

D. SUBPROGRAMME 4:

1. Page 68: Expected Accomplishment (b) (indicator (i)), the word ‘met’ has been added to the performance measures as below.

(i) Increased percentage of consumers ranking basic urban infrastructure services in the first three of their priority needs

Baseline 2009: 75% of consumers in UN-Habitat supported communities rank basic urban infrastructure services among the first three of their priority needs met

Estimate 2011: 80% of consumers in UN-Habitat supported communities rank basic urban infrastructure services among the first three of their priority needs met

Target 2013: 85% of consumers in UN-Habitat supported communities rank basic urban infrastructure services among the first three of their priority needs met

E. Programme Support Division

1. Page 77: Expected accomplishment (b) on Results-based management has been moved to this division, please refer to: Executive Direction and Management.
